

# Overview of areas for collaboration and Prioritisation

HMA Veterinary Taskforce  
15-16 September 2011  
(Jackie Atkinson)

# Monitoring sales of antimicrobials

<b>EMA/ESVAC/ Industry/</b>	Collection and reporting of sales data from across the EU in a uniform way
<b>EMA/ESVAC</b>	Develop/agree common units of measurement of use with others (e.g. USA)
<b>EMA/ESVAC</b>	Share experiences on collection and interpretation with others (e.g. USA)

# Understanding prescribing habits

EMA/ <b>HMA</b> / FVE	Developing together a questionnaire for vets across the EU to better understand prescribing habits
EMA/ <b>HMA</b> / FVE	Analysing the questionnaire data and identify the area where greatest leverage can be placed to modify prescribing habits

# Surveillance for resistance

<b>HMA/ Industry</b>	Developing more co-ordinated EU programmes for surveillance of target animal pathogens, sharing findings, considering their significance
<b>EMA/HMA/ Industry/Vets</b>	Encouraging reporting of suspected lack of efficacy of antimicrobials

# Marketing Authorisations for antimicrobials

<b>CVMP/EMA/HMA (+CMDv)/Industry</b>	Harmonisation of SPCs for <u>certain</u> antimicrobial veterinary medicines + prioritisation
<b>EMA/HMA/ Industry</b>	Implementation of Commission Decisions e.g. Adding warnings relating to prudent use
<b>CVMP/EMA/HMA/ Industry</b>	Ensure revised EU legislation so that the development of new antimicrobials and improved formulations of old but effective antimicrobials are worthwhile
<b>CVMP/EMA/HMA/ Industry/Vets</b>	Identifying and encouraging the availability of the right authorised antimicrobials
<b>CVMP/EMA/HMA/ Industry</b>	Consider innovative solutions e.g. Monographs
<b>Industry (IFAH/EGVVP)</b>	Consider pooling of available data
<b>Academia/ CVMP/ Industry</b>	Exploring the use of PK/PD modelling to optimise dose for antimicrobials

# Communication with Stakeholders

EMA/ <b>EPRUMA</b> / HMA	Co-ordinated, consistent communication to a range of stakeholders
<b>COPA- COGECA</b> /EPRUMA /HMA/Industry	Co-ordinated, consistent communication to farmers through a shared communication strategy

# Education (prescribers/animal owners)

HMA/ <b>EPRUMA</b> / Industry/Vets	Provide clear training materials highlighting what responsible use is and why it is important. Helping with the delivery of training.
<b>COPA- COGECA</b> /EPRUMA /Industry	Provide information to farmers on measures which can reduce the need for antimicrobials (disease prevention)

# Other

EMA/HMA	Encourage and follow appropriate developments in the area of antimicrobials for <u>human</u> use
Academia/ Industry/ CVMP <b>(SAGAM)</b>	Review literature and perform risk analysis re gene transfer
ALL	Ensure the revisions to the legislation (veterinary medicines, medicated feed, Animal Health) strike the correct balance
